**Subject:** No winners, just more wasted money.

How many new schools could we build with the money that is being wasted on this case? Better yet, how many people could be feed? What's more important, People or what kind OS/browser they use to access the internet?

Stop Wasting MY Tax Money!!!!

This lawsuit is a huge waste of tax payer money. The federal government should use MY tax money to provide valued services to me and all Americans. WHAT DOES ANYONE STAND TO GAIN BY SUEING MICROSOFT? Know one is forced to buy the Windows operating system, browser or any other Microsoft product. Apple Macintosh has been around for years and is a very viable alternative to the Windows platform for all who chose such. Linux is growing in popularity as another choice. I don't understand why your DOJ is pursuing this. If other companies want to sue Microsoft, they have the courts to do so. Let AOL, IBM or whoever sue them WITHOUT USING MY TAX DOLLARS! The DOJ should step down and let the other companies battle this out as long as their willing to pay.
